

If we ask lots of questions, it's because we are building a race car to your exact specifications. We have developed many great components we sell to fellow builders and racers direct.

Our goal is NEVER to make an existing component "fit" a customer's project. Building a race car to your EXACT specifications is job #1; developing great components through the process of crafting a custom chassis is a great second. Chris Duncan Race Cars manufactures an amazing array of custom fabricated components, everything from a simple roll bar to a complete pro chassis.

- Wishbone/Track Locator
- Wheelie Bars
- Fabricated Rear End Housings
- Anti-Roll Bars
- 4-Link Bars
- Motor and Mid Plates
- Brake and Gas Pedals
- Control Arms
- Steering Tie Rod Ends
